OTrack Primary School – Tracking Review

Points for consideration

Formative

I think we need to discuss staff workload in relation to recording formative data. The school is currently using the National Curriculum content set of objectives in OTrack. The table below tells me that each year there are approximately 126,009 assessments recorded in the OTrack Formative tracker.

Academic Year	Number of children	Total number objectives in POS	Average number of clicks to get to 'green'	Estimated number of outcomes to record
Nursery	22	0	3	0
Reception	37	0	3	0
Y1	37	147	3	16,317
Y2	41	157	3	19,311
Y3	37	191	3	21,201
Y4	38	197	3	22,458
Y5	36	212	3	22,896
Y6	38	209	3	23,826

I think we need to consider the following.

- Is this data used to impact on planning, teaching and learning?
- Can we use staff time more effectively by:
  - Not using the Formative tracker or,
  - Reducing the number of objectives used

Please note: I will need to understand your schools need further to help with this. However, from first review, I believe we can reduce, or omit, the time spent in the Formative tracker. I think we can do this whilst maintaining, or possibly improving, the quality of analysis you can get from OTrack.

- If you decide to continue with your Formative content, maybe our Content Editor will help you have more control over the content?

Summative

- How do teachers decide what a W1, W2, W3 is etc?
- Are the codes working for you in terms of analysis?

Please note: If need be, we can consider scrutinising other summative tracking methods to see if they will work better for you.

OTrack Primary School – Tracking Review

Test Scores

This feature isn't being used.

- Shall we hide the feature? This will include the reports and data entry screen. Hiding features that aren't used will help with usability.

Key Stage Outcomes

We need to populate data for:

- Y1 EYFS ELGs
- Y3 have end of KS1 Teacher Assessments

Other time saving features

- The use of bookmarks
    - Assessments
    - Report lists
    - Reports
